## ON OUR COVER

Translucency and bold colours are two trends on the rise for 2015. Hand-blown lights for Moooi, dress by New York fashion designer Jia Hua, and Nesting Hexagons created by Werner Aisslinger for Kvadrat.

**7 Candy Crush by Henzel Studio**

CultureEDIT curator Joakim Andreasson partnered with the Swedish rug company for a line that converts works by selected artists and designers, such as Juergen Teller and Helmut Lang, into floor coverings. Candy Crush, by New Yorker Mickalene Thomas, takes inspiration from '70s pop culture; it's hand knotted in Himalayan wool and silk. [byhenzel.com](http://byhenzel.com)

**8 Kia Sar by Warp & Weft**

Produced in narrow panels on small village looms, then joined together, these flat-woven graphic rugs take design and production cues from the antique Mazandaran kilims of Iran. Over 20 styles are available. [warpandweft.com](http://warpandweft.com)

**9 Cork & Felt by Danskina**

Hella Jongerius launched her first range of rugs as the newly appointed design director for the Dutch manufacturer. Several patterns are offered, including one non-woven piece made from randomized strips of cork and felt. [danskina.com](http://danskina.com)

**10 Surf by Gan**

Alejandra Gandia-Blasco looked to the beach for her playful collection of hand-tufted, board-shaped wool rugs. The four designs come in palettes of red, blue and white. [gan-rugs.com](http://gan-rugs.com)

**11 Human Nature by Interface**

This modular collection, in neutral or bold tones, references such natural surfaces as grassy fields, forest floors and pebbled garden paths. The narrow 25-by-100-centimetre planks consist of 81 per cent recycled content and are completely recyclable. [interface.com](http://interface.com)

**12 Japanese Folklore by Nodus**

Jaime Hayon's first piece for the Italian manufacturer is a whimsical collage of illustrations inspired by traditional Japanese folk art. The limited edition of 10, hand knotted in Nepal from wool and Chinese silk, measures 250 by 350 centimetres. [nodusrug.it](http://nodusrug.it)
